Why ECOUPP

Quality

As a mature brand with years of deep involvement in the sound - absorbing field, we have an excellent reputation and profound heritage, winning wide market recognition. We possess a stable and highly efficient modern production line, strictly following international standards to control the production processes and ensuring reliable product quality.

Service

In the tide of global trade, we actively explore both domestic and foreign markets, and our products are sold far to many countries. With high - quality products and attentive services, we have gained the trust and praise of numerous customers.

Products Features

Products introduction

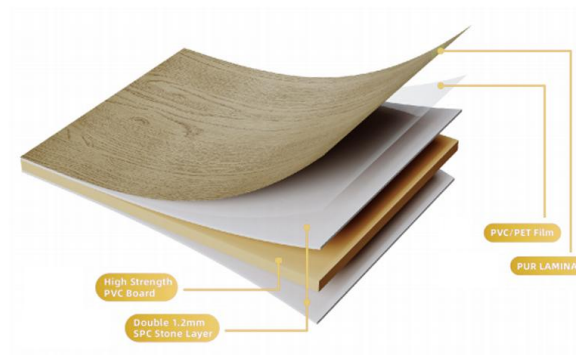

Carbon Crystal Board, an innovative interior decoration material, has surged rapidly in the architectural decoration sector in recent years. Leveraging advanced carbon crystal technology, it is composed of carbon elements and polymer materials through high-temperature and high-pressure processes, boasting exceptional stability and unique physical properties. Not only aesthetically pleasing, but also environmentally friendly and healthy, Carbon Crystal Board has emerged as the optimal choice for modern home and commercial space decoration.

Product Parameters

名称 Name	防撞板	Crash Proof Board
适用场所 Application	室内墙面与天花吊顶	Interior Wall decoration
产品材质 Material	60%钙粉+30%PVC+10%添加剂	5G-8 PVC 30% + CALCIUM POWDER(CaCO ₃) 64% +STABILIZER 3% + CARBON BLACK POWDER 1% +90 PE WAX2%
厚度 Thickness	8mm	8mm
产品密度 Density	1.0-1.2kg/m ³	1.0-1.2kg/m ³
产品规格 Dimension	1220*2440(mm) 1220*2800(mm) 1220*2900(mm) 1220*3000(mm) 1220*定制长度(mm)	1220*2440(mm) 1220*2800(mm) 1220*2900(mm) 1220*3000(mm) 1220*Custom length(mm)
环保级别 Environmental protection grade	法国A+ VOC ≤1g/m ³ 	CE / FRENCH A+
防火级别 Fire rating	国标B1级阻燃材料	B1

碳晶板
Carbon Crystal
Board

Product features

Products introduction

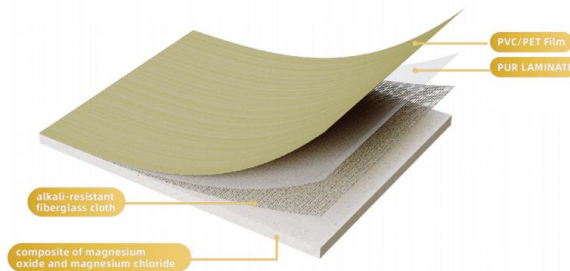

The upgraded version of the carbon crystal board -the anti-collision board, which employs PVC material and features a 1.2mm thick co-extruded SPC (Stone Plastic Composite) surface, not only inherits the superior performance of the carbon crystal board but also enhances the overall strength and impact resistance of the board. Widely adopted in hospitals, schools, kindergartens, malls, hotels, exhibition halls, airport subway stations, and other public areas.

New Choice for Fireproof Decoration: Magnesium Oxide board 玻镁板

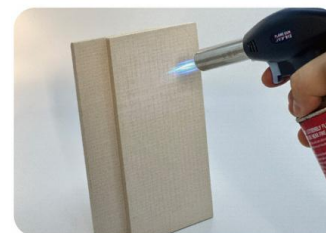

Products introduction

1.Product Overview

Magnesium oxide board, commonly known as MgO board, is a composite panel made from a ternary system consisting of magnesium oxide, magnesium chloride, and water, with the addition of modifiers. It has been widely used in construction and interior decoration due to its outstanding fire resistance, waterproofing, and anti-corrosion properties.

The primary components of magnesium oxide board include high-purity and highly reactive magnesium oxide (MgO), high-quality magnesium chloride (MgCl₂), alkali-resistant fiberglass cloth, plant fibers, lightweight and non-flammable perlite, chemically stable lithopone, high-molecular-weight polymers, and high-performance modifiers. These components, processed through specialized techniques, confer unique physical and chemical properties to the magnesium oxide board.

Product features

Exceptional Fire Resistance:

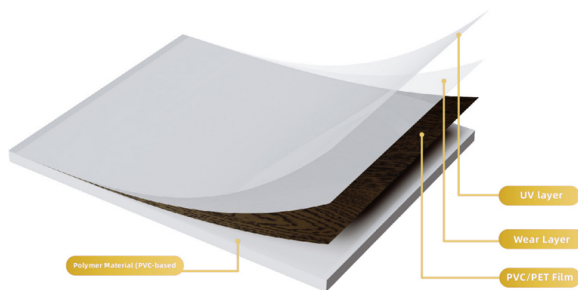

The magnesium oxide board achieves the highest fire resistance rating of A1, and when combined with a partition system made of high-quality keels, it can withstand fire for over 3 hours.

Product Parameters

名称 Name	玻镁板	Crash Proof Board
适用场所 Application	室内墙面与天花吊顶	Interior Wall decoration
产品材质 Material	玻镁板的主要成分包括活性高纯氧化镁 (MgO)、优质氯化镁 (MgCl ₂)、抗碱玻璃纤维、不燃膨胀珍珠岩、化学稳定立德粉、高分子聚合物以及高性能改性剂。	magnesium oxide (MgO)+magnesium chloride (MgCl ₂)+alkali-resistant fiberglass cloth + plant fibers + lightweight and non-flammable perlite + chemically stable lithopone + high-molecular-weight polymers + high-performance modifiers
厚度 Thickness	6mm	6mm
产品密度 Density	1.0kg/m ³	1.0kg/m ³
产品规格 Dimension	1220*2440(mm) 1220*2700(mm) 1220*3000(mm)	1220*2440(mm) 1220*2700(mm) 1220*3000(mm)

SPC WALL PANEL

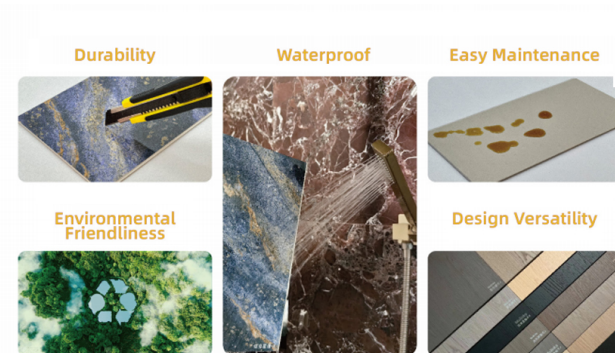

石晶墙板

Products introduction

The application of SPC Wallboard (Stone Plastic Composite Wallboard) in bathroomsholds significant advantages, primarily manifested in the following aspects:SPC Wallboard is integrally formed through high temperature and high pressureusing natural stone powder and polymer materials, without the use of any glue duringthe production process. As a result,it possesses exceptional waterproofing andmoisture-proof properties. This characteristic makes SPC Wallboard ideally suited forhigh-humidity environments such as bathrooms, effectively preventing water penetra-tion and wall dampness, thereby protecting the wall structure and extending its servicelife.

Product features

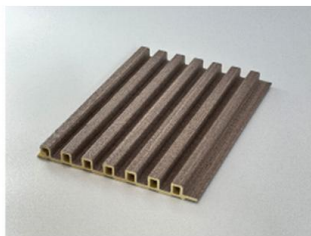

Product Parameters

名 称 Name	SPC石晶墙板	SPC WALL PANEL

WPC FLUTED WALL PANEL

格栅板

The wpc fluted wall panel utilizes eco-friendly pvc material, which is non-toxic and odorless, complying with international environmental standards. This material exhibits excellent weather resistance, corrosion resistance, and aging resistance, maintaining stable physical and chemical properties even in harsh environments. Additionally, it is fire-retardant and easy to install.

Installation Steps

1. Tools and Materials

Drilling machine/impact drill
Spirit level
Screwdriver
Electric drill
Tape measure/ruler
Scraper knife
Adhesive
Rubber mallet/wooden hammer
Joists/angle iron
Screws, wall expansion bolts
Trim/molding
Slotting machine

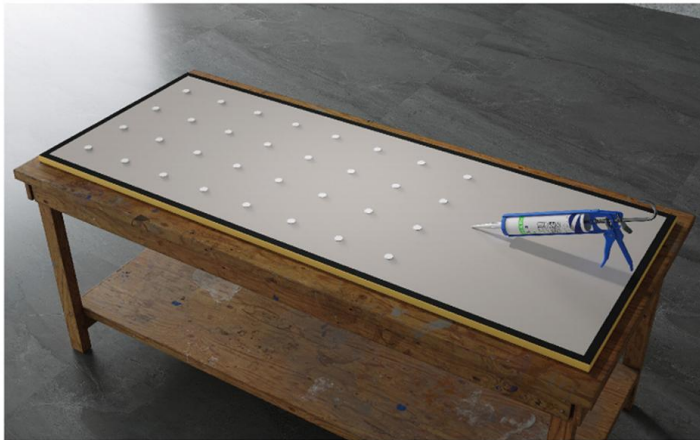

2.Installtion Steps

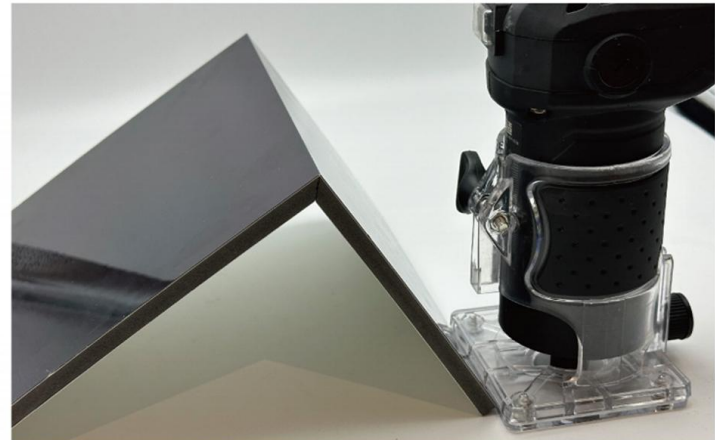

- 1、Clean the Base Surface Treatment
- 2、Padding and Making level

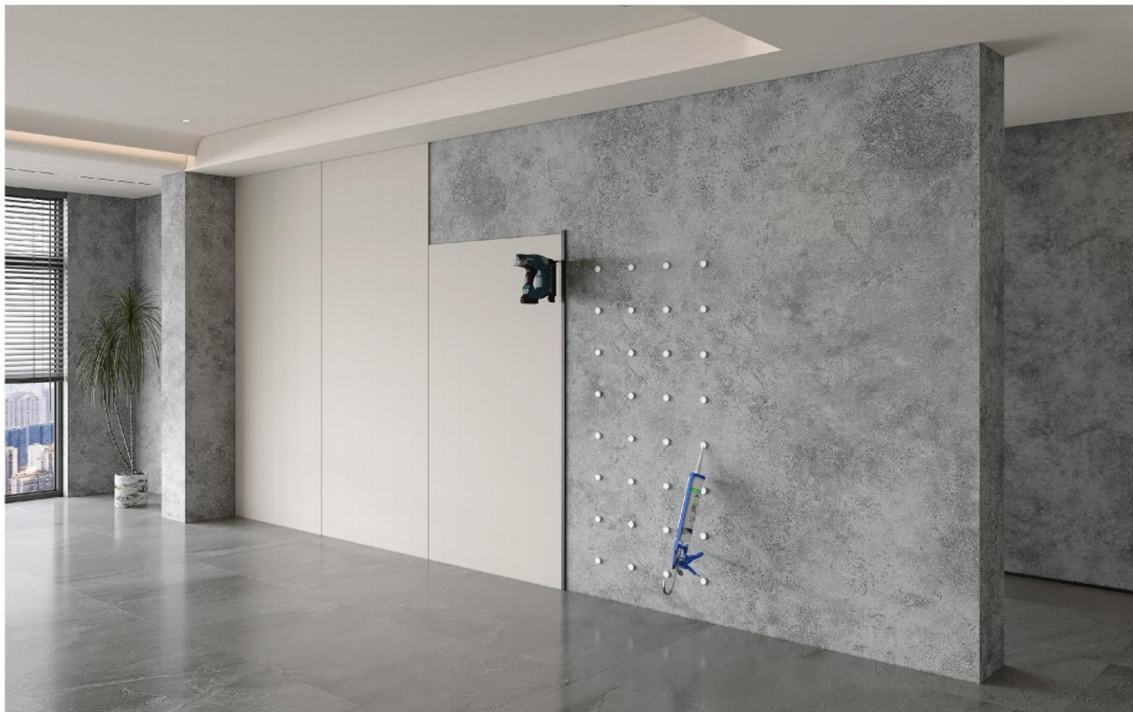

- 3、measure the height of the wall
- 4、cut the wall panel with a circular saw

- 5、apply adhesive with a glue gun on the back of the panel on the wall in point glue in 20cm each one, double tape on the edge of the panel

- 6、For the inner and outside corner use the grooving-machine with Vshape or circle shape knife head.

7、fix the metal trim(S8611-01)to the starting position with a nail gun

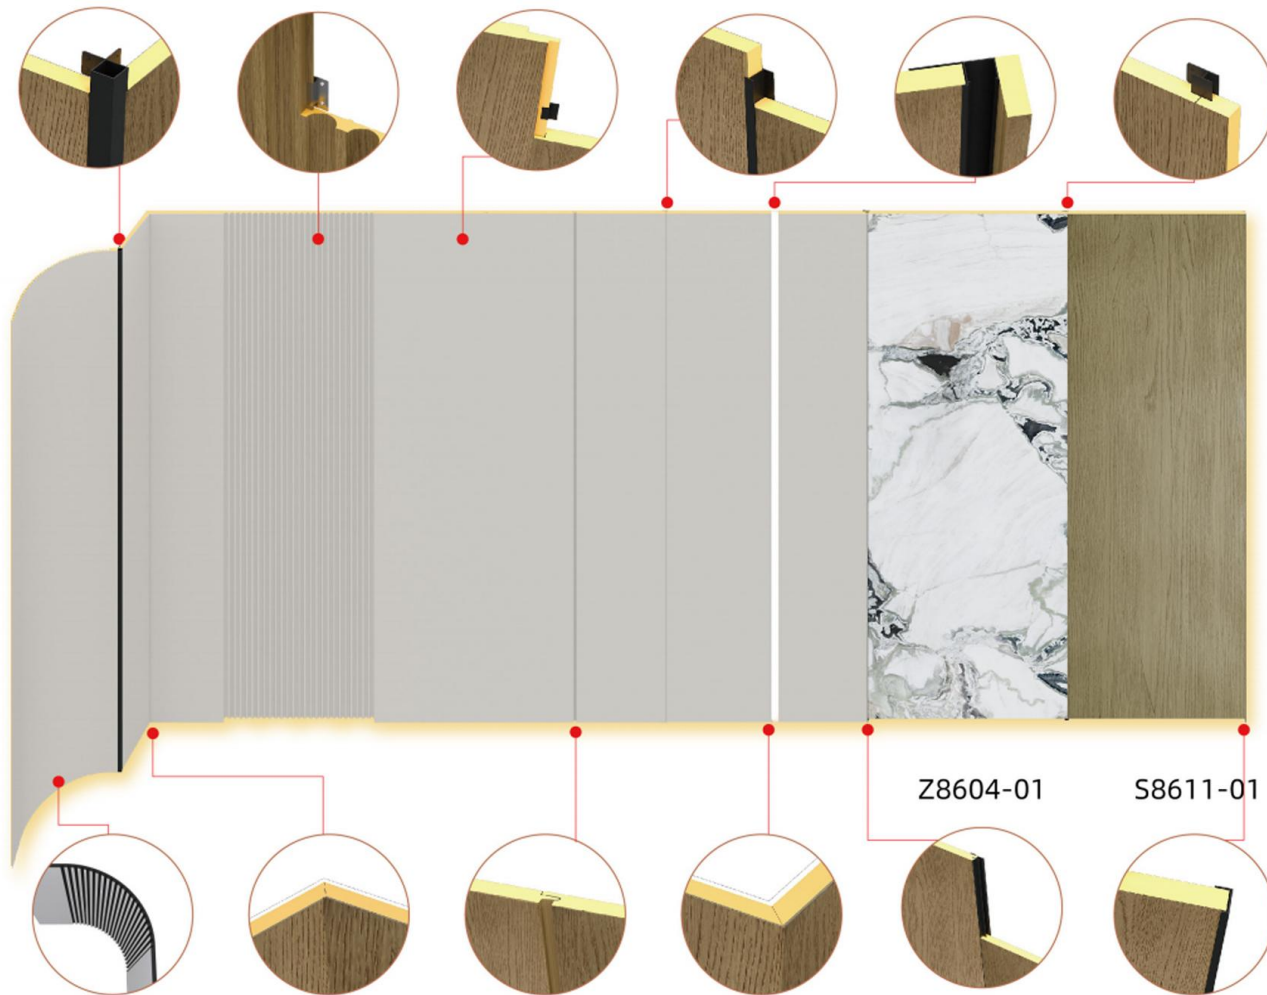

Z8605-02

Z8605-02

S8611-01

Z88122-02

08.install the first wall panel

09.connecting with the metaltrim

10.Repeat the installation process with the next wall panel

11.connecting with slotting(u shape,- male and female shape)to make seamless flat joint

12.install fluted wall panels with steel-buckle clip

13.measure the remaining wall size , cut the wall panel with the electric circular saw, and use the metal trim(S8611-01) to binding of the last panel

14.For the inner and outside corner, use the grooving machine or install the metaltrim(Y8618-03)

15.To make a inner or outer arch shape, using the electric cutting saw ,cut in 1cm interval for the arch area
16.repeat the installation process with the next wall panels, continue along the wall until you have completed
